CHEMICAL MILK PEEL AFTERCARE

1) Don't scratch or pick at the treated area. There may be slight peeling but this is normal, refrain from touching it and opt for a cold compress as it will alleviate any itching.

2) Moisturise your skin. The drying and flaking of these skin is a normal reaction to the treatment, simply ensure that you give your skin extra moisture during this.

3) Protect your post peel skin from the sun. Since the skin has been stripped to reveal new, healthy skin it is crucial that you stay out of the sun as much as possible and make sure you wear an SPF of 30+ to further protect your skin.

4) Take a break from makeup. It is recommended that you try avoid makeup just for a little while as so to not clog any new pores or irritate the skin.
